

## Cedar River Maintenance Dredging

Approximately 120,000 cubic yards of gravel and sediments will be removed from a 1.25 mile stretch of the river from its mouth to the Williams Street Bridge. Also, unstable banks will be repaired, storm pipe outfall improvements will be made, vegetation will be replanted, and invasive vegetation adjacent to the levee and floodwall will be removed. The result will be a reduced risk of flooding to private, public and commercial properties. All work will be conducted in accordance with local, state and federal permits obtained for the project.

From June 15, 2016 through August 31, 2016, the lower 1.25 miles of the Cedar River will be closed to recreational activities, and the boat ramp will see temporary closures. The Cedar River Trail will remain open. Visit [Rentonwa.gov](http://Rentonwa.gov) for current information on temporary closures and detours.

**This project is funded by the King County Flood Control District.**
